

# Little Buddies

Every Little Buddies bag will consist of a single cultivar, however depending on the availability, the cultivar will vary from batch to batch. These cultivars will be named and grouped by Sativa or Indica strain and THC content.

The back of each bag of Little Buddies will feature information about the included cultivar. If this cultivar is available in the Little Green Pharma (LGP), Lush Labs (LL) or CherryCo Signature (CC) product ranges,

it will be clearly indicated in brackets on the back of the bag (e.g. Lemon Skunk (LGP) or XXXOG (CC)). This means a patient can continue with the same flower cultivar for every script but the prescriber will need to write a new script for this specific cultivar from the LGP or CherryCo Signature range, as long as it is available.

The following cultivars can be expected to be included in the Little Buddies ranges, along with others in future. Please note, these cultivars won't always be rotated through the range and some are premium craft smalls.

15g sachet

The strain information is located on the back of the sachet.

## Potential cultivars & terpene profiles<sup>†</sup>
